NEWS.md	✓	3/3/2023 3:57 PM	Markdown	5 KB
README.md	✓	3/3/2023 3:57 PM	Markdown	2 KB
Run Inkscape !.bat	✓	3/3/2023 3:57 PM	Windows Batch File	1 KB
Run Inkscape and create debug trace.bat	✓	3/3/2023 3:57 PM	Windows Batch File	1 KB
Run Inkscape with GTK Inspector.bat	✓	3/3/2023 3:57 PM	Windows Batch File	1 KB

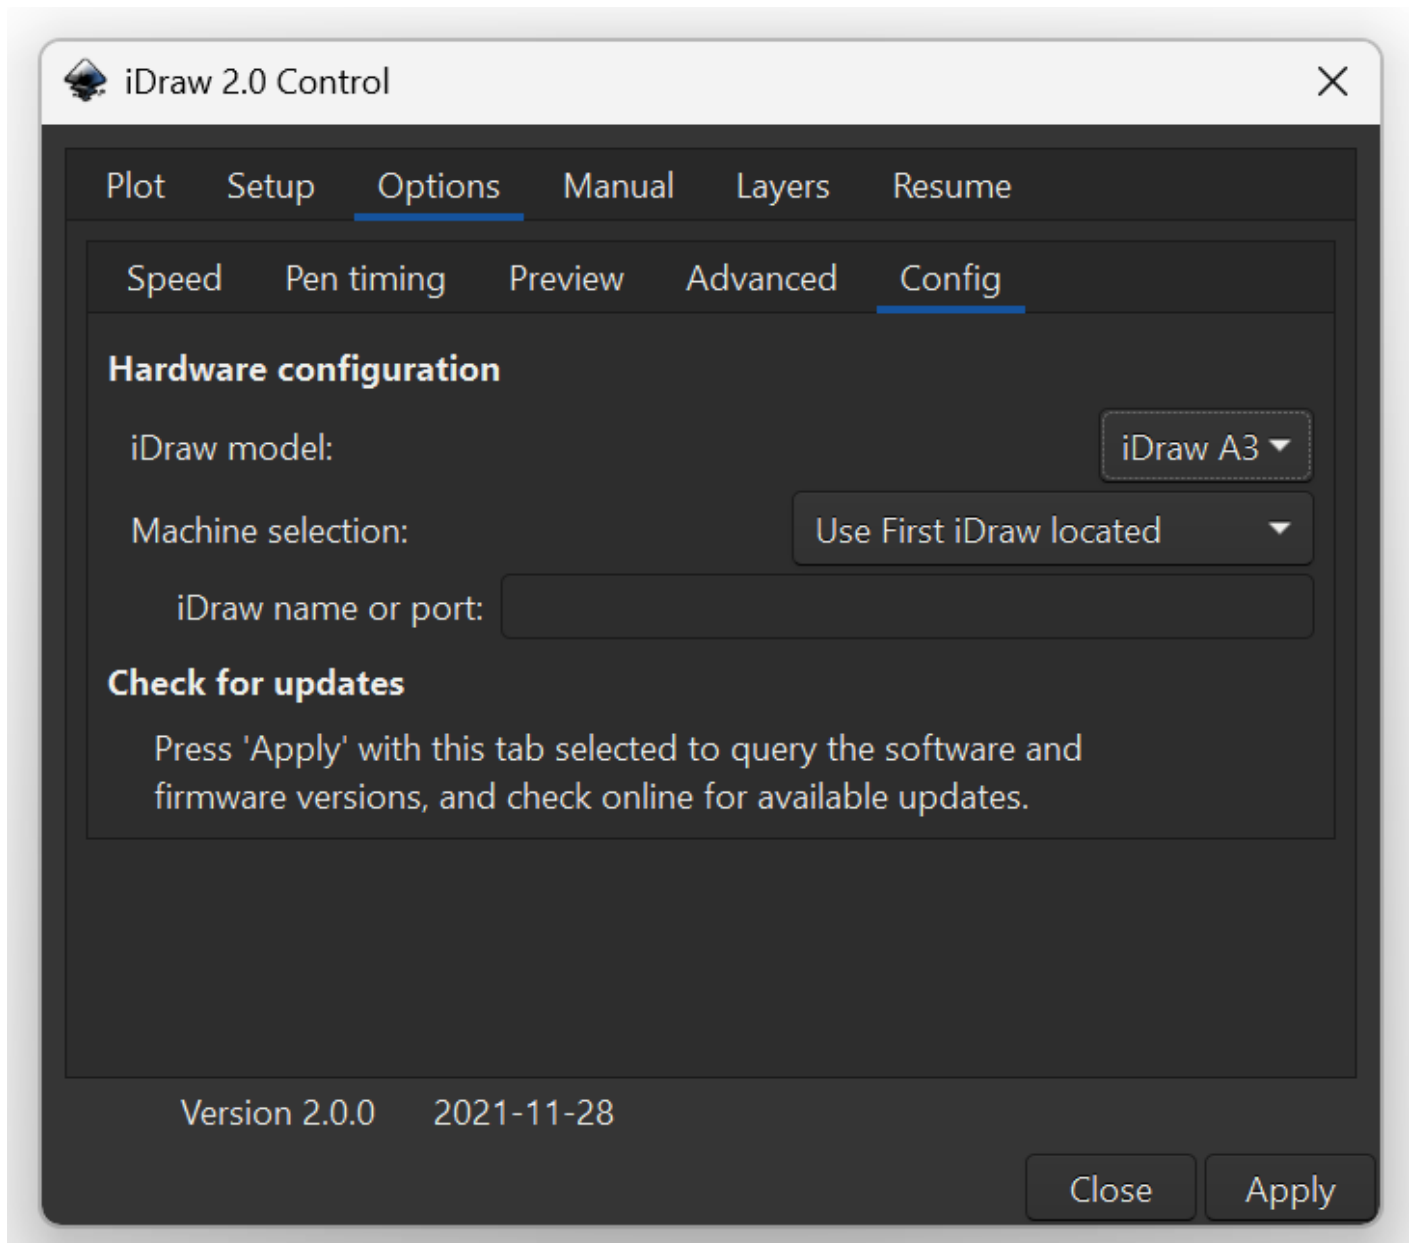

1. install the driver in the folder ☐ Windows_Driver
2. Run the Run_incscape!.bat file

Mac or Linux

1. download the software from [here](#)

Inkscape Settings

Go to extensions -> iDraw 2.0 Control

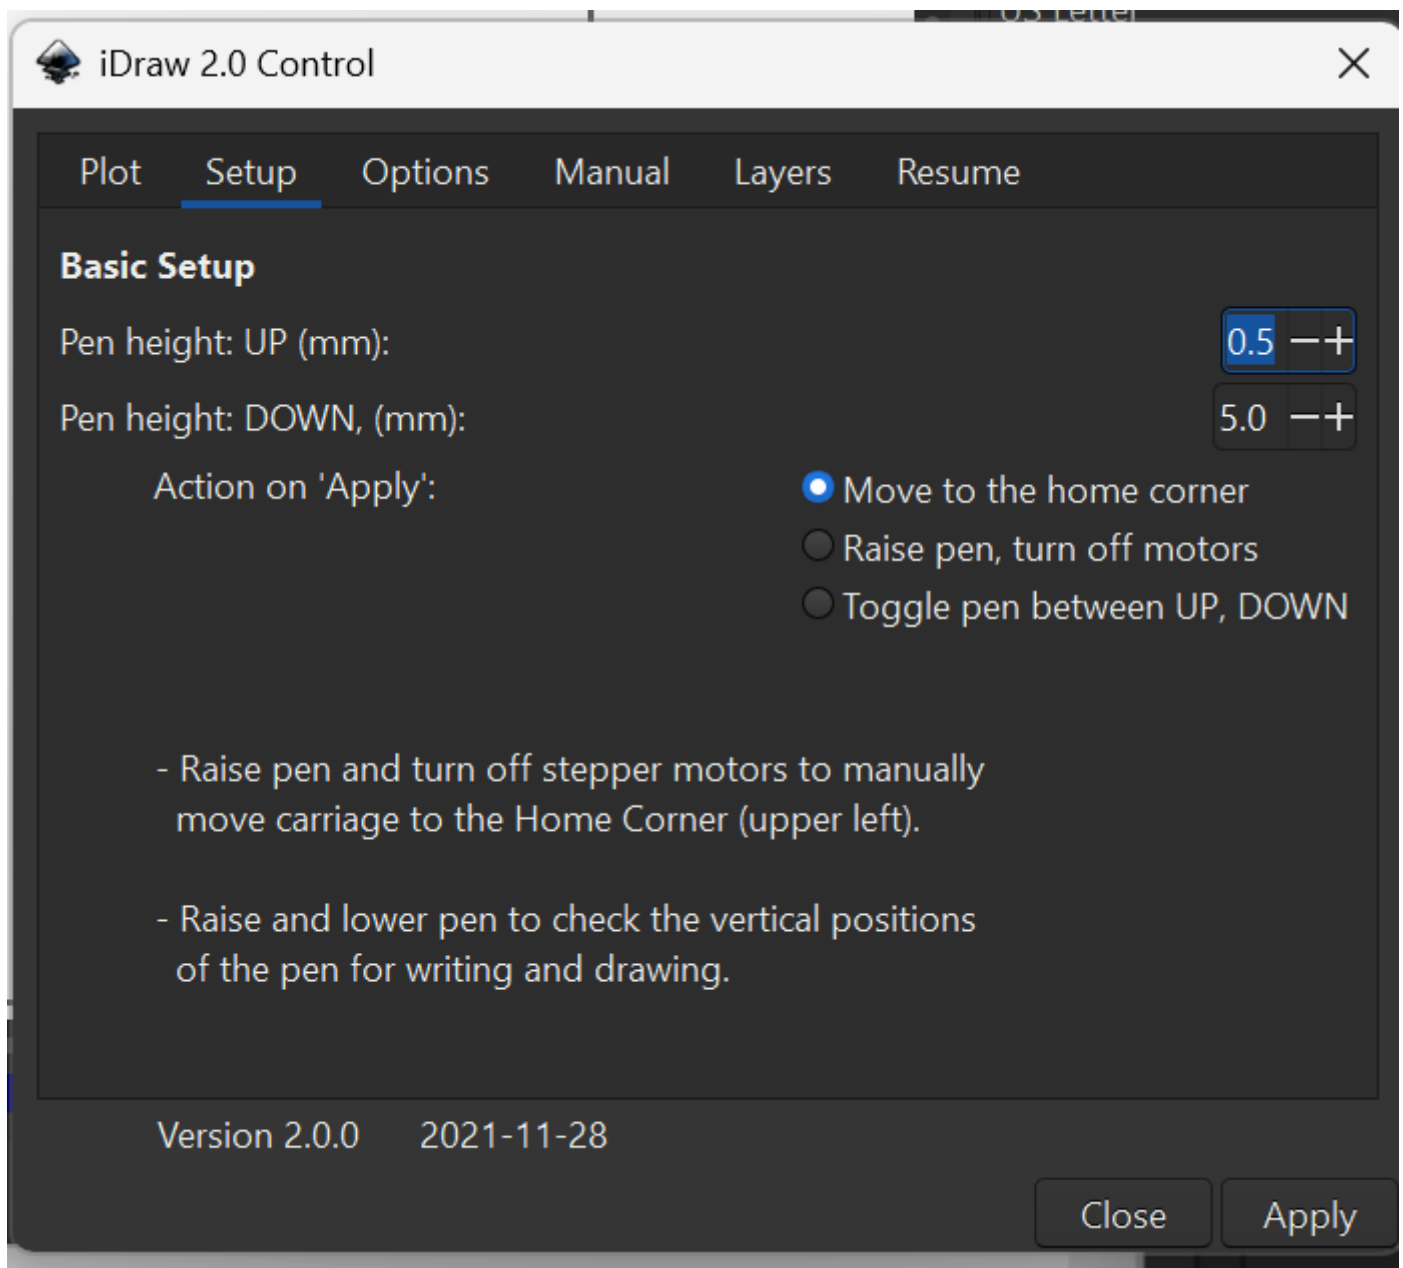

in the dialogue go to **Options -> Config** and configure the iDraw model from iDraw A4 to **iDraw A3**

This needs to be set to **iDraw A3** every time you open inkscape - this setting is not remembered

under Options -> Setup adjust the pen height of the pen up and pen-down position.

Try it out before you start a drawing in order to prevent damaging the plotter

Revision #3
